

# Simplifying and exposing SAP® BAPI to the business

SAP® systems are installed with hundreds of Business Application Program Interfaces (BAPI®) that are able to move data into and out of SAP. BAPIs are a standard system-based way for communication between SAP and other systems, enabling customers to perform an array of high performance and complex data functions.

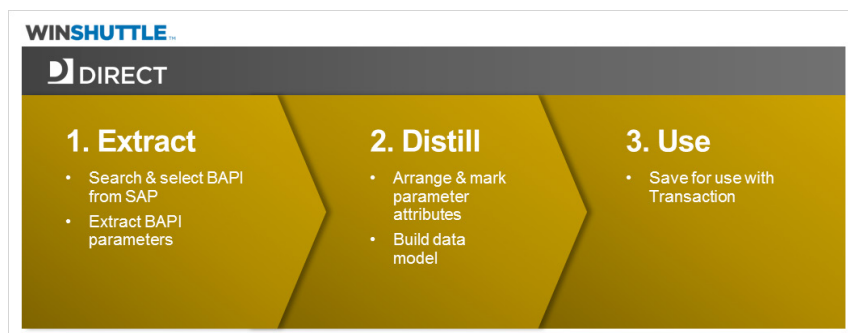

## Use SAP BAPIs without ABAP programming

Winshuttle Direct™ for SAP BAPI allows a technical user to access relevant BAPIs from the Business Object Repository and map the fields to a Microsoft Excel™ spreadsheet, easily creating a file that can act as a template for any BAPI enabled SAP business process.

A Winshuttle Direct template allows users to shuttle data between the desktop and SAP or extend BAPIs for systematic use by business users without the deep technical understanding of how a BAPI works. BAPI capability within the Winshuttle Studio™ suite further enhances the ability of businesses to automate data entry in their SAP systems in a consistent and repeatable way.

## Key benefits

- Business Object Repository (BOR) search capability
- Intuitive User Interface
- Ability to classify and categorize fields
- Ability to view documentation on BAPIs in the application
- Flexibility in editing field selection list
- Automatic Data Backup on execution
- Logical Branching
- Looping
- Real Time and scheduled loading
- Respect for SAP security authorizations
- Chaining
- Error Management
- Allows the creation and update of data that may not be easily accessed via an SAP GUI transaction

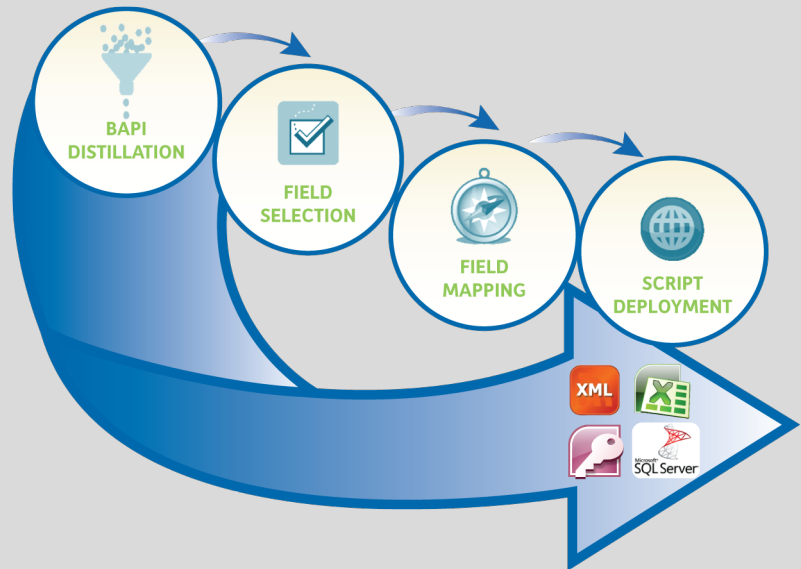

“Winshuttle saves so much time that it really inspires everyone to look around and think, ‘OK, how else can this product make us more effective?’”

- Nick Hancock, Senior Business Analyst, Wales & West Utilities

## Four Steps to Leveraging BAPI in your SAP Landscape with Winshuttle

1. BAPI Distillation
2. Field Selection
3. Field Mapping
4. Script Development

Existing SAP functions that are not available via standard SAP transactions and the SAP GUI can now be easily accessed through Excel, thanks to Winshuttle Direct. Winshuttle Direct further transforms business data processing both during implementation of SAP projects and for daily operations in a post go-live environment. With Winshuttle Direct, users can import, extract and maintain data reliably and securely.

## Requirements

### Hardware

- 250 MB disk space
- 512 MB RAM

### Browser

- Internet Explorer 8.0 or later
- Firefox 17 or later
- Chrome latest version

### SAP

- SAP 4.6C or higher
- RFC Authorizations
- SAP GUI 460 or higher

### Microsoft

- Windows XP/7/8

### Winshuttle

- Transaction

**WINSHUTTLE™** Empowering People | Making Heroes

Founded in 2003, Winshuttle is a global company with sales and support offices worldwide. For more information about Winshuttle solutions or to contact a representative near you, please visit [www.winshuttle.com](http://www.winshuttle.com).
